1. Course Evaluation

Auswertungsteil der offenen Fragen

1. Course Evaluation

1.15) What did you especially like about the course?

- Great workshop sessions and discussions!
- I greatly benefitted from the course and it gave all of us the opportunity to engage in fruitful discussions concerning our research proposal. The course facilitated the possibility to ask about methodological and research design specific questions and discuss them in the cohort. Prof. Gschwend was always open for new ideas even if the research presented was far away from this own discipline. I can highly recommend this course.
- I think the course was clearly helpful (although I didn't expected that in the beginning). Making us constantly work (and write!) has helped a lot to clarify my research ideas and helped me when writing the dissertation proposal.
- Nice feedback for own research ideas and good atmosphere during the one day workshops
- Nice to present and listen to research projects, good way to meet fellow PhD students
- Very useful course, helps a lot with structure of course

1.16) What could/should be improved?

- Aa we had one workshop last semester and two this semester, the content of the presentations were a little redundant (maybe mix up the groups for the second workshop?); I never really got profound feedback , as it is hard to present the topic thoroughly in such a short time (although I don't know who this could improved...);
- Nothing.
- larger time intervals between meetings because the dissertation topics or planned experiments did not change within 6 weeks for most of us. More time would be good to improve the proposal more clearly
- would have liked it to be interdisciplinary (I know it was a democratic decision, still I would have profited more)
